DETAILED ACTION

Election/Restrictions

Applicant has indicated that claims 11, 16, and 29 (which, incidentally, depends from canceled claim 28) are withdrawn. Note also that claim 10 depends upon canceled claim 7. However, in view of the approximately eight amendments received by the Office since the last Action on the Merits, further restriction is deemed proper.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 5, 6, 10, 12-15, 17, 30-32, 35-39, drawn to Accessory with pad, plate and vibration decay pattern modifier (pad and modifier being of organic elastomer), classified in class 42, subclass 74.
- II. Claims 18, 19, and 22-25, drawn to Accessory with plate and pad, classified in class 42, subclass 71.01.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the pad of the combination need not be resiliently compressible and the plate is not required to close the opening in the

pad to form a sealed pocket. The subcombination has separate utility such as a stock pad in which a vibration decay pattern modifier is not utilized.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Upon election of one of Groups I and II, above, further election must be made under 35 U.S.C. 121 to a single species claimed as set forth in the Office Action of 20 December 2001.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
